Beginners Snorkellers Advanced Free Diving

Located in the Jeddah region of Saudi Arabia, Sha'ab Nezar offers a diverse range of landscapes and marine life for divers and snorkellers of all skill levels. It features eight distinct dive sites, all of which are just a short distance away from the coast, making any one of these the perfect spot for a quick day trip or a spontaneous weekend getaway packed with action.

At Sha'ab Nezar, sloping reef walls, large canyon cracks and shipwrecked vessels are just some of the features adorning this mesmerising underwater topography. However, you'll also have plenty of time to glide lazily along sandy plateaus, assimilating with the many varieties of marine life that live across this dive area.

While the vibrant hard and soft coral native to the Red Sea are undoubtedly the stars of the show, sites are also teeming with sweetlips, barracuda, nudibranch, red snapper, anthias, whitetip sharks and more. Divers can also expect to see starfish, groupers, butterflyfish, mackerel, jackfish, tuna and Napoleon wrasses swimming among the reefs. And no matter which site you pick to visit, the range of visibility, between 12 and 35m, means you'll have a stellar view of these aquatic animals.
